"One Love"

Visit "[One Love](#)" on MotoLyrics.com

All these years, I have been waiting

All those lies that you have told

All these days that flow together

I will stay alone

All these nights, I lay not sleeping

Meet each sunrise tired and blue

All my dreams of our love keeping

My heart stays safe at home

All your words, close to me, precious

I'll take with me to heaven above

Do not spend your days ungracious

And you will find your one true love

And you will find your one love
