"Come Back"

Visit "[Come Back](#)" on MotoLyrics.com

Never looked back on a love affair.
I never spent minutes on history,
It made me sad, it made me so sad.
And in no time no time at all
A change has begun and the name is you,
I feel strange, you've made my life strange.
Cos baby when you get close to me
I say there's a certain chemistry
Come back before you leave.
I haven't got room for a broken heart.
Come back before you leave.
You shouldn't go at all,
You shouldn't go at all
So many years and so many nights,
I still can recall oh the way that you move when you
dance,
Do you want to dance?
We've had our habits and attitudes,
You make me remember the power when everything's
right,
Please stay the night.
Cos baby when you get close to me
There's something about you I really need
Come back before you leave...
Babe, come back before you leave,
I'll be the air for you when you breathe,
I'll be the raising sun.
Close the door, let's make love,
All God's angels sing above into the rising sun.
