My world has  
Found a different path  
It's found a better light  
Without him by my side  
And I cannot take from what we had  
All of just two times  
His heart won over mine

And don't think the thoughts of the lost  
And what's left in the dark will leave you so easily  
It never did for me oh oh

It's far worse  
To love then not at all  
It's true, I hear it's so  
At least you'll never know  
What you've been missing  
When you're forever always wishing  
When you're forever always wishing...

And he was  
The kind that you would dream  
The kind that you would want  
Or so it had seemed  
Cause blind eyes  
Lose you for a while  
It lost me in a smile  
Back with my friend denial

And don't think the thoughts of the lost  
And what's left in the dark  
Will leave you so easily  
It never did for me oh oh

It's far worse  
To love then not at all  
It's true, I hear it's so  
At least you'll never know  
What you've been missing  
When you're forever always wishing  
When you're forever always wishing...

And naturally you find it hard to take  
When you think you'll never feel the same again  
And thankfully I'm not so hard to break  
This could have broken me oh oh

It's far worse  
To love then not at all  
It's true, I hear it's so  
At least you'll never know  
What you've been missing  
When you're forever always wishing  
When you're forever always wishing...
