"Precious Moments"

Visit "[Precious Moments](#)" on MotoLyrics.com

I believe that the time is right
Spiritually we're one for life
It brings joy I can't explain
You see through me
When I try to hide behind my pride
You're the face that I see
When the past would haunt me till I cry
But true love shadow the pain

Precious moments
Hold me now
I'll never let you go
I'll never let you go

A thousand times you stole my heart
A true sign this was planned from the start
Hope God it works in funny ways
(Don't you know that I love you
Don't you know, don't you know that I love you)
Put a smile on my face
Cause I know the best is yet to come
And I remember the place
When you first told me I was the one (yes you did)
And I know that's no mistake

Precious moments
Hold me now
I'll never let you go
I'll never let you go

And uh... this love gets deeper as it goes
It saved me from the walk alone
It gave me hope
Love set me free
But if our melody is the same
Then we both will always know
That the feeling will remain

I believe, yes I believe, I believe
I'll never let you go
I'll never let, I'll never let you go

Precious moments
Hold me now
I'll never let you go
I'll never let you go

I'll never ever let you go
Never ever let you go
Oh no I won't, I never will
Oh no I won't, I never will
I'll never ever let you go
Never ever let you go
Oh no
