I'm hurting now  
Cause who would've known  
The perfect night would be frauded  
And it's the same way how  
I asked you before had you put an end and departed

Unfinished business my dear  
You see it different  
But look it's all here  
Don't try and blind me  
As you've done to you I'm no fool  
I see behind the sad eyes  
No matter what you tell me  
No I'm no fool  
I see behind the sad eyes  
No matter what you tell me  
No I'm no fool

What do I say when you're always telling me  
That we move in a different way  
The only difference is that I'm feeling  
A space that's left  
And though it ain't something new  
It's something used  
You know that it is the truth

Unfinished business my dear  
You see it different  
But look it's all here  
Don't try and blind me  
As you've done to you I'm no fool  
I see behind the sad eyes  
No matter what you tell me  
No I'm no fool  
I see behind the sad eyes  
No matter what you tell me  
No I'm no fool
