"Where Were You"

Visit "[Where Were You](#)" on MotoLyrics.com

Where were you
When you left endless streets inside my head
A dinner for two
There I fell as you planned with those words you said
Love's biggest fall was with me
I'm the worst of them all
Come try me again

But I will never cross that river for you
Cause I climbed that mountain and I stood up there
But... where were you

Hiding the truth
Just to bind for some time while you held my heart
I need I always knew
But I stayed outta scene just to play a part
There's no shame in your game
Just to not show your (?) all the same
That contrary again

But I will never cross that river for you
Cause I climbed that mountain and I stood up there
But... where were you

I got the worst of this
Some say I deserve it
What you do what you say
(?)
You got the power
With words you devour
Every last part
You've broken my heart

But I will never cross that river for you
Cause I climbed that mountain and I came down
Without you
