Everything is lonely
Here without you
You know I'm breaking
Breaking all over again
I can't live without you
If you not here at all
You can take my hand
Hold it until the end
I wish you could feel something
You could be my dream
You never see
When I became lost and unseen
I'm singing under this tree
Just thinking were not far
What I think you should know
I love with all my heart

I'll sit here and wait (2X)
Until you come around again
And hold my hand again

I'll sit here and wait (2X)
I'm still singing in the rain

Everytime I'm down
I always think of you
Everything is Hopeless
Hopeless without your pressense
This world feels so cold
This feeling I might fall
If you could feel my heart
Feel it until I'm gone
Someday you might feel something
And you could be my strength
You always see
I became found and seen
I'm sitting on the grass
Just feeling were not far
What I think you Should know
I feel it inside my heart

I'll sit here and wait(2X)
Until you come around again
And hold my hand again

I'll sit here and wait(2X)
I'm still singing in the rain
With cloud on my head

Oh someday you could feel inside
I wish I can get by
I will never feel the same
I could feel the times you cried
Someday you could be here
I'm still singing in the rain
Hold my hand again
Someday we can run away

I'll sit here and wait(2X)
Until you come around again
And hold my hand again

I'm sitting here again
