"You Meant Well"

Visit "[You Meant Well](#)" on MotoLyrics.com

Well, you fought me till your diamond ring
I'm lonely from the pain you had felt
You left me in distress
You kept up your gloves but you tried your best
And I know you don't mean no harm
But everything just seems to go wrong
Like the last time, the last time you said love
You know that you're sent from above
And you mean well, you mean well

I just want to know
Why you looked at me
Made me feel alive
Then walked out on me

What you sayin' bout your mind, well mines gone
I left it over your house just the other day
Has it really been this long?
I can't stop thinking about the games we played
And I know you don't mean no wrong
But everything just seems to do harm
Like the first time, the first time we made love
Angels call your name from above
And you mean well, you mean well

I just want to know
Why you looked at me
Made me feel alive
Then walked out on me

I just want to know
Why you looked at me
Made me feel alive
Then walked out on me

You walked out on me

I guess we could say this is goodbye
Even though how hard you tried
I know one day I'll get by
Even if I can't sleep at night

And I know you don't mean no harm
And I hope he can keep your hand warm
Like I did, like I did through the years
Through the fights and through the tears
You meant well, you meant well

I just want to know
Why you looked at me
Made me feel alive
Then walked out on me

I just need to know
Why you stared at me
Made me fall in love
Then walked out on me

You walked out on me
You walked out on me
But you meant well
But you meant well
