And I fall on my knees tell me how's the way to be  
tell me how's the way to go  
tell me all that I should know  
And I fall on my knees  
tell me how's the way to go  
tell me how's the way to be to evoke some empathy  
Danger will follow me now everywhere I go  
angels will call on me and take me to my home  
well this time i just wants to be at home  
And i fall on my knees tell me how's the way to go  
tell me how's the way to see  
show me all that i could be  
and I fall on my knees tell me how's the way to be yeah  
tell me how's the way to go  
tell me why I feel so low  
Angels will follow me now everywhere I go  
angels will call on me and take me to my home  
well this time I just want to go  
I don't see clearly cant feel nothing no  
can't you hear me?  
And I fall on my knees and angels will call on me now everywhere I go  
angels will call on me and take me to my home  
and angel will fall on me everywhere I walk  
angels will call on me and take me to my home  
and angels will call on me now everywhere I go  
angels will follow me now lead me to my home
