(Roy Drusky)

The day you went away snow was on the way
First day of spring today without you baby
Now there's no memory of how it used to be
But it don't bother me without you baby.

Now I'm finding love all around me
Love I never knew was here before
Tender things just seem to surround me
So I won't miss you anymore.

You stayed away so long that now it's been too long
Cause that ol' feelin's gone that drove me crazy
But have no regret I haven't missed you yet
So many plums I'll get without you baby.

Without you baby, without you baby, without you baby...
