Noone listens to you - But you keep talking cause that's  
What you do  
You need a new dictionary - There are more words than  
Me, me, me, me

So if you got something to say - this is the time  
If you got something to tell me - this might be your  
Last chance  
You have my attention now babe

So go ahead, go ahead, go ahead, go ahead  
I'm listening, c'mon and tell me everything  
So go ahead, go ahead, go ahead, go ahead  
I'm listening so spit it all out

You can't be right all the time - You can't be wrong  
All the time  
I'm sorry for the things that I do - From now on I'll

Be friendly to you

So if you got something to say - this is the time  
If you got something to tell me - this might be your  
Last chance  
You have my attention now babe

Go ahead now, baby don't be shy, noones blaming you,  
And there's no right or wrong  
Go ahead now, baby don't you cry, I will count to 5,  
And that's the time you got  
Go ahead now, you were right once, I don't remember  
When, but it could happen again  
Go ahead now, baby don't be shy, tell me everything,  
Just tell me everything
