Sun and love together wherever we will go
We'll be forever wherever we will... (x3)

Once you found another place to stay
Do you like another game to play?
Now is time to gonna move arround
Take me over, let me hear the sun
I want hapiness as much...
I wanna dry the tears of everyone
Don't forget the promaises you make
Will help yourself and your brother

Sun and love together wherever we'll go we'll be
forever
Forever with you believe (x2)

Now we need a change for everyone
I've been dreaming for a long long time
Black or white you gonna be alright
There's no reason anymore to fight
All the flowers and the trees arround
All the children sitting in the ground
Don't forget the promaises you make
Will help yourself and your brother
Would you play?
Would you play another game with me?
Now this is a time for you baby don't cry please don't
cry
THE SUN!
