Oh somewhere there's a place for you
When your heart is crying
And somewhere there's a helping hand, for sure
Don't let your heart turn into stone
If your love is dying
'Cause somewhere there's a love you can't ignore
I'll hold you, I'll hold you
Hold you close tonight

'Cause if you will call me, I'll be there
And if you need me, I'll take care
If you will say, I need you tonight
I will stay with you, with you, with you

I love you more than words can say
But your heart is broken
Him or me, what it's gonna be
Baby there are many words,
Words that left unspoken
Baby but you are my destiny
I'll hold you, I'll hold you
Hold you close tonight

'Cause if you will call me, I'll be there
And if you need me, I'll take care
If you will say, I need you tonight
I will stay with you, with you, with you

'Cause if you call me, I'll be there for you
And if you need me baby, I'll take care
If you will say, I need you tonight
I will stay with you,
I will stay with you, with you, with you
With you, with you, baby
With you, with you, hey
With you, with you, ooh
I will stay with you, with you, with you
