Arabian nights, we're just arabian night  
Arabian nights, Arabian night

I've been to France and England  
And the shores of Timbuktu  
But nothing can compare to that strange land where I  
met you  
The desert sands of Baghdad was the place we fell in  
love  
And the nights we spent in that mystic land is all I can  
think of

Arabian nights, we're just arabian night  
Arabian nights, Arabian nights

Too many words unspoken  
And promises unkept  
And now my heart is broken  
So many nights i've wept  
Made love in an oasis  
While the moon was up above  
And the nights we spent in that mystic land is all I can  
think of

Arabian nights

The night that you were with me  
So right, it was meant to be  
The heat of the ---, love and the feel  
Are all that can happen when you sail...

Arabian nights, it's just Arabian nights  
It's just Arabian nights, it's just Arabian nights

The way I feel about you girl  
I'll chase you all around the world  
The nights are getting stronger  
Arabian nights
