Here in my hometown
People are feeling better
Take a look around
If you try, you can find a smiling face
They don't worry
They don't want after everything
People find their happiness
In the simpler things
Here in my hometown
My brother married his childhood sweetheart
Some will bring them down
But these are the people who search their
Whole lives long
They don't worry
They're in love - they have everything
Look ahead to the joy
Being together brings
Here in my hometown
There's always someone right there beside me
Here in my hometown
It's gonna be a lovely day
Here in my hometown
I get a certain feeling
Walking all around
There's a chill in the air and
The leaves are turning brown
Here at home
A love and family
Ever strong
Here at home
I finally know where I belong
Here in my hometown
There's always someone right here beside me
Here in my hometown It's gonna be a lovely day - hey
Here in my hometown
Right where I started
Home, home is where the heart is
Here in my hometown
It's gonna be a lovely day
