"Let Her Stay"

I - making an effort to be real
Writing the words I really feel
Imagination's gone this time
And I - making an effort to hold on to you
Pray to the stars, what can I do?
To keep you ever by my side
Let her stay this time
Heart and soul and mine (forever)
All that's left to find, we'll find
Let her stay
Once again - Facing the same depression
I - I'm just not good enough
And how, could I take it out on one so dear
It's just not fair
Oh I - I can be faithful to myself
And give my love to no one else
And pray that she'll come home to me
Please make her see
Let her stay this time
Heart and soul and mine (forever)
All there's left to find, we'll find
Let her stay (this time)
La la la la la
La la la la la
Let her stay this time
Let her stay this time
(Let her stay this time)
I pray that she loves me
(Let her stay this time)
I pray that she'll find a home
(Let her stay this time)
She's mine
Fade
(I pray that she loves me)
