"Run"

Visit "[Run](#)" on MotoLyrics.com

Meet me at the back door
I got to see you coming from below
I want to feel the sunlight in my hair
So keep coming

We can take it slow
Oh, we can drive just a little faster
'Cause even when
we're still going to get there
So keep holding

Shut the windows, bolt the doors
We're gone

We can run, we can run
So we'll race towards the sun
We can sing, so we'll sing about us
Feel the rush, let it show
See your face, let it go
Just say yes, and we'll sing about us

I think I found a way out
Do you believe?
Fallen to the floor
You're going to be the one to surrender
So keep coming

Head in from the cold nights
And feeling tired
Just take a deep breath
And then fill your lungs with excitement
So keep holding

Shut the windows, bolt the doors

We're gone

We can run, we can run
So we'll race towards the sun
We can sing, so we'll sing about us
Feel the rush, let it show
See your face, let it go

Just say yes, and we'll sing about us

I got you right next to me
Driving out past these dead end holes
I want to feel everything
We're going up
We'll make it golden and glisten alone

Head in from the cold
But we're getting really close
So we'll sing about, sing about us

I think I found a way out
Are you ready for a break out?
We'll sing about, sing about us

We can run, we can run
So we'll race towards the sun
We can sing, so we'll sing about us
Feel the rush let it show
See your face, let it go
Just say yes, and we'll sing about us
Just say yes, and we'll sing about us
