

Badlees, The

"A Fever"

Visit "[A Fever](#)" on MotoLyrics.com

(Naydock, Palladino)

With flu

I dream of you

In light as blue as neon when it's blue

Past visions of rolling hills

In movie stills

A panoramic stew

Above the scientific

Element, content

We spy the view

(Chorus)

A fever's brought me close to you

In ways we can not be

A fever's brought me close to you

In ways we can not be

Even in memory

Sublime

In double time

We climb to where convention swerves and leans

'Couple-a-beers

In a tent by sears

By a giant plastic nativity scene

In color dogs endure

I'm sure

The light you've given me is green

(Chorus)

I mouth petitions

Oh those soft renditions

Of the ones I've come to lean on

For you

Again, in blue

And straightening a photographic dawn

May I experience

The sense of

Where I dream you when I'm gone

(Chorus 2x)
