You got to ease into line boy  
But once I hit the open road

I'll be sailing off and on my own

You and me in my GT  
With those little red lights in front of me  
When I go to heaven you know that's where I want to be

Would you please fill it up boy  
I'd like to stop and catch myself a bite

but I sure hate to leave the road tonight

Instrumental in 3 movements: 1st, 2nd, and 3rd gear.  
And when I'm racing the clock  
You know that I would die or kill somebody

just to move th  
is hunk of steel one more block

Spoken (with mild disdain as one gropes for the  
stick):

I think I see a little red light in my rear view mirror  
A terrific case ensues, resulting in many highway  
statistics and ultimately, the realization of the  
desire expressed in the chorus. RIP
