There's an ocean of stars and a sea of moonlight  
Rainin' down on us tonight  
And the wind through the willows is singin' that song  
I wanna keep my arms around you all night long just  
holdin' on

Caught up in the motion of your every move  
So lost in the moment, spinning, falling into you  
I'm everywhere I wanna be, girl your love is all I see  
When you dance with me

There's a magical moment when you take my hand  
A chemistry I don't understand  
The way our bodies start movin' in time  
The way you move me blows my mind, you blow my  
mind

Caught up in the motion of your every move  
So lost in the moment, spinning, falling into you  
I'm everywhere I wanna be, girl your love is all I see  
When you dance with me  
Dance with me

How could I be so lucky  
To have you dancin' with me?

Caught up in the motion of your every move  
So lost in the moment, spinning, falling into you  
I'm everywhere I wanna be, girl your love is all I see  
When you dance with me  
Dance with me

When you dance. when you dance with me  
When you dance, your love is all I need  
When you dance, when you dance with me  
When you dance, your love is all I see
