Why must I be the one
To pull the trigger to this gun
Put a bullet through your heart
To keep you from tearing me apart
Go ahead try to stop me now
I'm not afraid and not going down
My pain has taken it's toll
There's no way I'm letting you take control

Remember my words (x2)

When old memories
Came out from the dark
Reminded me that your heart was too far
Let me show you all that I've got
Let me show you I'm not what you thought
Let me show what to see
Let me tell you what I mean
