You're working your ass off, you're trying to survive  
You're using all of your skills but it's not enough to  
pay your bills

That makes you so worried and you can't sleep at  
night

And must wake up 5 in the morning to give your sweat  
and sell out your life

Your share is not right

You have nothing left, you have no life

You can't have your slice

'Cause someone is eating the whole pie

(Every time I see them driving their expensive cars or  
when

I'm passing by their fancy houses and realize that I  
'm contributing

For their for their prosperity, I get so pissed off... I'm  
not looking for luxury,

But I deserve something better. I can't take this  
anymore

And I have a plan, something to do with revolt and  
gasoline)

Kill the rich, you're just a victim in this world of greed

Kill the rich, you're just cheap labour and your blood  
they leech

Kill the rich, they give you dreams but never let you  
succeed

Kill the rich, kill the rich if you want to be free.
