Treated with neglect, They just want to get rid of you.  
Do you still believe in public health care? They want you  
dead to reduce their cost. I don't want your drugs, you  
can't keep me numb! Fuck your phone advice, give me  
a real treatment now. It's a mass murder conspiracy!  
They could have cured her cancer but she just found  
that out too late, She didn't get the right tests in time  
and now she's dead. Maybe he would never hung  
himself, if he had some psychotherapy, He just got  
some pills instead and now he's dead. Your mind's  
about to blow up, Your body is all falling apart. They  
don't give a fuck about your pain, Their duty is to save  
money for the state.
