Gotta let you know what's on my heart
Everything we had just fell apart
Guess I should of known this from the start
'Cause you were playing with my heart
Thinking at a future just as friends
Is this out beginning or the end
Will we make it real or just pretend
Here we start our love over again

So don't leave, you're the one that I adore
I know you're worth fighting for
So don't go up and out the door
x2

Watching everything we've built just fall
Taking faded pictures off the wall
Wonder if I took the time to call
Would you even answer at all

Was it a real love or just a ?
Can we make amends, let's start ?
I don't really care who's wrong or right
As long as you're still here in my life

Chorus x2
