[VERSE 1]

Uh uh...

Is it the accent the hype or the way she walking  
am i, am i dreaming or am i sleep walking  
got my arms out stretched so i don't bump into her  
silly me now im so into her fashion  
To her style her dress  
and im looking in the mirror like do i look fresh? do I?  
Do i look fresh enough to get her,  
If i see her one time then i wont forget her

Cos i... i took a picture mentally when i pulled up in the  
black on black bent-a-ly and i...  
I really feel like she was meant for me  
If she wasn't then i know she was sent for me  
cos she.. shes the only one that made me chase  
got me singing love songs like Baby face  
and i tried to one night her but she made me wait... she  
made me wait.. hah!

[CHORUS]

And so i think she got something, she got something  
Yes she got something, something that i like  
(something i like, oohh she yeah)

So i think she got something, she got something  
Yes she got something, something that i like  
(oooooh, now break it down like)

She's got that something, shes got that something...  
that i like  
(uh, say it again like)

She's got that something, shes got that something...  
that i like  
(uh)

[VERSE 2]

I slow it down 'fore i pick her up  
Its 8 o clock now we dating, inevitably dudes be hating  
but i... i still gotta flaunt my chick

I laugh, no surprise that they want my chick  
Shes... more than they can comprehend  
British dudes idolize me they copy him  
Hes just too witty, game is too gritty,  
look at his track record man, theres too many  
Tens, thats too many to count  
I spin, thats a any amount  
no matter to sum homey got the cash to cover it  
And i when wanna see she be fast to mother it  
Yeah... just so she can take my ends  
Would i let her to it hmm, well that depends  
Can she raise a young king? my blood is royal  
And if she can man it aint a thing to spoil her

[CHORUS]

And so i think she got something, she got something  
Yes she got something, something that i like  
(something i like, oohh she yeah)

So i think she got something, she got something  
Yes she got something, something that i like  
(ooooh, now break it down like)

She's got that something, shes got that something...  
that i like  
(uh, say it again like)

She's got that something, shes got that something...  
that i like  
(uh)
