can you fix this it's a broken heart
it was fine and it just fell apart
it was mine but now i give it to you
you can fix it you know what to do

so let your love cover me
like a pair of angel wings
you are my family you are my family

stood outside in the summer rain
different people with a common pain
simple box in the hard red clay
where we left him to always remain
child who played with the moon and stars
waves a shach of hay in a common barn
in the lonely house of adam's fall
lies a child just a child that's all

crying let your love cover me
like a pair of angel wings
you are my family your are my family
you are my family your are my family
