Oh baby
Why you talking to me (why you talking to me)
You're crazy
I'm taken is it so hard to see

Oh baby
You've got so much to say (so much to say)
You've gone too far
And I think that she might have seen you look my way

And you tell me you want me
You need me again
But I can't speak those words girl
I just cannot let you in
And I said

I wanna know the way you're thinking
Tell me if the way I feel is right
I wanna take a risk worth taking
And just come alive
This is it
We're alone
It's just me and you
But it doesn't feel right
Cause it's now or it's never she says
With me tonight

Oh baby
You've got me weak in the knees (got weak in the knees)
And I'm feeling kinda nervous
So I think I'm gonna ask you to leave

But you tell me you want me
You need me again
But I can't speak those words girl
I just cannot let you in

I wanna know the way you're thinking
Tell me if the way I feel is right
I wanna take a risk worth taking

And just come alive
This is it
We're alone
It's just me and you
But it doesn't feel right
Cause it's now or it's never she says

And I
Could live my whole life without
A goodbye
Now it's time to forget
All those nights alone
We spent so close
Leave behind
Tonight

I wanna know the way you're thinking
Tell me if the way I feel is right
I wanna take a risk worth taking
And I said

I wanna know the way you're thinking
Tell me if the way I feel is right
I wanna take a risk worth taking
And just come alive
This is it
We're alone
It's just me and you
But it doesn't feel right
Cause it's now or it's never she says
With me to-
Cause it's now or it's never she says
With me to-
Cause it's now or it's never she says
With me tonight
