Tracing your lips in my mind  
Every curve and every last goodbye  
Til she takes up her nights  
Keep our moments here alive

Show me all your secrets  
Lose all your feeling in this wasted love  
Let go of reason  
Make me believe it  
Oh, this wasted love

Far from innocent you are  
Falling victim to a broken heart  
And the one you leave at home  
While we pass the night alone

Show me all your secrets  
Lose all your feeling in this wasted love  
Let go of reason  
Make me believe it  
Oh, this wasted love

And when you make it back home  
Do you feel regret?  
For the love that you stole?  
Do it all again

Show me all your secrets  
Lose all your feeling in this wasted love  
Let go of reason  
Make me believe it  
Oh, this wasted love  
Wasted love!
