"Gravity"

Visit "[Gravity](#)" on MotoLyrics.com

Every time that you told me
That we would write our own story
Something in your voice that made me believe you
For every way that you stole my heart
For everything that you are
There's something 'bout your love
That tells me I need you

But you can't get started
When you're heavy hearted
We're both fighting gravity
And it's making it hard to breathe
When your hope gets frozen
And your fear's unspoken
Cause you don't want to fall again
Well I'm falling too

If this love's enough for you
And this love's enough for me
Then why can't we overcome this gravity
It's pushing down on you
It's pulling down on me
Why can't we overcome this gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
This gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground

Everybody gets afraid
Of saying what they wanna say
They don't want their words to get caught in the open
I wanna take that chance on you
Knowing all that I got to lose
Standing on this road but
I don't know where it's going

But you can't get started
When you're heavy hearted
We're both fighting gravity

And it's making it hard to breathe
When your hope gets frozen
And your fear's unspoken
Cause you don't wanna fall again
Well, I'm falling too
If this love's enough for you
And this love's enough for me
Then why can't we overcome this gravity
It's pushing down on you
It's pulling down on me
Why can't we overcome this gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
This gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
Why can't we overcome

I, I wonder what you're thinking
I, I gotta find a reason
I, I want your love to lift me off the ground
I, I wonder what you're thinking
I, I gotta find a reason
I, I want your love to lift me off the ground

If this love's enough for you
If this love's enough for me
Then why can't we overcome this gravity
It's pushing down on you
And it's pulling down on me
Why can't we overcome this gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
This gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
This gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
This gravity
We can't get off the ground
We can't get off the ground
We can't get off the ground
Cause this gravity
