VERSE 1

Shake, feel it come alive
Cornered with surprise
The plan was always there
Hidden, but no one cared
To care, is everything we need
Makes the struggle feel complete
I've been there once before
Where grey shadows eclipse the doors, that hide
The sun from my eyes

PRE-CHORUS

Sleeping well from the sound
A deep sleep, I never wanna wake up
Never wanna

CHORUS

Stay, a prophet leading the way
Pull and find, sadness crowding the line
Still, face, everyone needs their space
As you do

VERSE 2

Quick, find a place to spy
Subtle with disguise
It took me 20 years
To finally disappear
Into the night
Crazy, but I'm right

PRE-CHORUS

Sleeping well from the sound
A deep sleep, I never wanna wake up
Never wanna

CHORUS

Stay, a prophet leading the way
Pull and find, sadness crowding the line
Still, face, everyone needs their space
As you do
