Please select a sense for me  
Help me stand my pulse  
Introduce me how to breathe  
Revolve around my life

Daily identical feelings  
I recognize them all  
Please select an end of mine  
What a waste of time

I wish that you could feel  
This distance to myself  
I guess I dreamt of silence  
Like whispers in a cage

Individual weakness  
Based on imperfection  
Indifference as a part of life  
Iâ€™m sure thereâ€™s no return

First-class simulations  
Please select my past  
Am I a replication?  
Insignificant at last?

Remote control from inside  
My soulâ€™s a burning room  
Where do I have to go to die?  
First steps even hurt

Emotionless Iâ€™m waiting  
My coldness takes effect  
Who wants to be a common man?  
Who wants to be excused?

Intentionless decisions  
I recognize them all  
Artificial loneliness  
As part of whatâ€™s called life
