[Arsun F!st] It only takes one mind to fuck the world up
It only takes a few dollars to make a hoe suck It only
takes one wish to come true for a kid born with cancer
to believe in you So what are you doing? I made my
mind up It only takes one mistake to open up your eyes
bruh Can you find it in yourself to realize that there's
only one day in the rest of your life? So what are you
doing? Get off your ass Make a difference, bring
change, play a role, take a stand But you gotta do
somethin It only takes one to be a man so the rest can
stop frontin I find strength with a cool Guinness But the
real power comes when your soul's in it Where the
sidewalk ends, this rhyme begins But it only takes one
verse to fall in love with my pen So what are you doing?
I'm not a rapper I became an MC to write the world a
different chapter It only takes one beat to make your
head nod But you need five mics to be considered hot
Heh, really? Classic or average What separates the
best from the baddest? Fresh from the whackness,
opinions are all that really matters Skills never counted
if they did you'd be garbage Regardless... there can
only be one There can only be one
