I can still watch those eyes
Crawling over her dress until
I could show you everything
But I don't have to hear the words
Cause I already feel your thoughts
So it comes as no surprise
That all the intent is real
And all the suspects are right
And if we stop
it all falls down
cover my eyes
obey my ignorance
to purify you
I'll only watch you rot
Without malicious intent
Your doubt resembles someone else
Stick the needles in me
Stick the needles in
Stick the needles in
Stick the needles in
And if we watch it all comes down
Breathe and let it go
Dropped and winding
Fuck your confession
Fuck your confusion
Dissolve my insides
And make it hide
Crawling on dignity
That which you do to me
Hold on forever
The fair day weâ€™
Weather.
