Fresh from Moscow  
Over Volga came to comrades aid  
City in despair  
Almost crushed by the Führer's army

Oh, it's colder than Hell  
Hitler's forces advancing

The sound of the mortars  
The music of death  
A grand symphony

See your friends fall hear them  
Pray to the god your country denies  
Every man dies alone and when your  
Time comes you will know that it's time

Stalins fortress on fire  
Is this madness or Hell

The sound of the mortars  
The music of death  
We're playing the devil's symphony  
Our violins are guns conducted from Hell

Oh Stalingrad  
Mratnimiat

Are you playing?  
Do you follow the conductors lead?  
No one knows you  
No one cares about a single violin

Play the score of the damned  
Know the devil within
