Off in the distance, around the corner, out of sight  
Knew somewhere your dream was waiting  
Hidden just beyond the light  
All in a moment, hard to seem to fall in line  
Sparks are flying from your heels, nothing's gonna hold you back this tiiiime

Going places, brand new faces  
Wide open spaces for my dreams, no one figured it (Whooooa)  
Going places, finally on my way  
(Somebody saiiid)  
Somebody said "there's no mistake about you", I ain't figured it

In the times of trouble, my friends will pull me through  
Even when those clouds are raining down on me  
For that one approving glance, all I needed was a fighting chaaance  
Going places, ooh, anyplace we choose (Ooh, ooh, ooh, oooooh)  
Seems like together, we can't looose  
(Going places) Going placeeeees (Go-ing pla-ces)  
Going places, me and yooooou  
(Going places, go-ing pla-ces)  
Ooooooh, yeah
