"Travel With The Northern Winds"

Visit "[Travel With The Northern Winds](#)" on MotoLyrics.com

I will travel in the night
To ancient hills and darkened forests
I am a human lost in time
And I was told that I'm no mortal

Travel with the northern winds
May the forest overpower you
Up in the sky and by the horizon
Deep in the depths and deep into the earth
Darkness is whispering - you're now deceased,
Now you will see the ancient ones for real

I travel with northern winds
And I don't belong among mortals
My soul is in the astral skies
While my body hides in darkness

My blackened mind dreaming of the ancient
Thinking back to the past
Where my soul shall dwell
Trapped into this lifeless empty shell

I am freezing and my blood is cold
