"Walk Away"

Visit "[Walk Away](#)" on MotoLyrics.com

One last night falling down on us
One more night breaking this tonight
This is nothing like we did last year
This is something more you'll see it here
I love the way you do it when you tell me
We are through it
Now I know that you never meant that much at all

Just walk away now walk away
I never needed you to stay
I got lot better things to do
Than sit around here waiting for you

One last chance I gave to you that night
You left it didn't even fight
Now you know you got me asking more
If this is what I want to do this fall
I love the way you do it when you tell me
We are through it
Now I know that you never meant that much at all

Just walk away now walk away
I never needed you to stay
I got lot better things to do
Than sit around here waiting for you

Just walk away now walk away
I never needed you to stay
I got lot better things to do
Than sit around here waiting for you
