Verse 1

You've been overwhelming me
For far too long
Why would I wanna be without you
There's no room for another

Illuminate my dark nights
My days they shine so bright
You're my every reason
You indulge my every need

Bridge

I been so hurt so many times before
It's the reason I closed my heart
But when you walked into my life
I knew that this was my surrender

Chorus

How could I want no one else
The way you live to make me happy
And if I let my wisdom inform me
It's telling me that you're the one

How could I want no one else
The way you live to make me free
And if I let my heart instruct me
I know that we will never part

Verse 2

I could be so complicated
Sometimes not easy to love
I'm stuck in my ways coz
I know what I want and
There's little room for sh**!

When I'm lying in your arms
The world seems to disappear
I'm lost in your world
There's no easy way out
From this way you love me

Bridge

I been hurt so many times before
It's the reason I closed my heart
But you're patient with me
You're gentle with me
I love the way you love me

Chorus

How could I want no one else
The way you live to make me happy
And if I let my wisdom inform me
It's telling me that you're the one

How could I want no one else
The way you live to make me free
And if I let my heart instruct me
I know that we will never part

Bridge

I been hurt so many times before
It's the reason I closed my heart
But you're patient with me
You're gentle with me
I love the way you love me

How could I want no one else
The way you live to make me happy
And if I let my wisdom instruct me
It's telling me that you're the one

How could I want (3x) no one else
How I could I want no one else

How could I want (3x) no one else
How I could I want no one else
