Unknown Substance  
A putrid Cloud -  
Choking all within Results of Progress,  
A noxious Waste -  
Floating in the Air  
Living free?  
Chemically  
So now our World is fading into slowly burning out  
Prime Wealth?  
Toxic Health  
Advancing towards extinction is the way it's turning out  
Foul Air?  
Do you care?  
Is Cleanness where  
you live going against your common believe  
Too much slime, insufficient time?  
In a suffocated future  
will you find the time to breathe  
Jammed in one place  
Blind in haste  
Progress can't wait  
A life in waste  
Tending towards - Technology  
Reverse of: life's biology  
Chemical comatose  
Radiation overdose  
Burning, melting flesh  
Leaking slime of dissolving waste  
Overflowing blackness of death  
Creation is being torn down by abuse  
Infringement of the substance and our use  
Elements decomposing, dilution is too slow  
Every contribution, to the evolution  
Its bad gets worse; deathly course.  
Swallowed in Black  
Faced with reality?  
Search your memory  
Nothing dead ever comes back  
The Black
