Unknown Substance

A putrid Cloud -

Choking all within Results of Progress,

A noxious Waste -

Floating in the Air

Living free?

Chemically

So now our World is fading into slowly burning out

Prime Wealth?

Toxic Health

Advancing towards extinction is the way it's turning out

Foul Air?

Do you care?

Is Cleanness where

you live going against your common believe

Too much slime, insufficient time?

In a suffocated future

will you find the time to breathe

Jammed in one place

Blind in haste

Progress can't wait

A life in waste

Tending towards - Technology

Reverse of: life's biology

Chemical comatose

Radiation overdose

Burning, melting flesh

Leaking slime of dissolving waste

Overflowing blackness of death

Creation is being torn down by abuse

Infringement of the substance and our use

Elements decomposing, dilution is too slow

Every contribution, to the evolution

Its bad gets worse; deathly course.

Swallowed in Black

Faced with reality?

Search your memory

Nothing dead ever comes back

The Black
