You and I, we had it all.  
I wonder why, I let it fall.  
I don't know why,  
I make this hard for you.

And if I go, and get it back,  
Apologize, for all I lack!  
Would you be there, to take this heart?  
Would you do anything at all?

Take me back to yesterday,  
I swear it on your life,  
I'll stay on the short side,  
I'll stay on the short side.

Take me back to yesterday,  
If you can forgive me,  
I will, stay by you only,  
Though if, you can forget,

We can get around this,  
Get around this, get around this,  
Get around, we can get around this,  
Get around this, mess.

Now you can go, you can leave.  
I wouldn't blame, you for a thing.  
I acted like, I never should.

But I will stay, and I will bleed.  
Stand in the rain, I'm begging please.  
Cause I'll be here for you,  
Yeah, I'll be here for you.

Take me back to yesterday,  
I swear it on your life,  
I'll stay on the short side,  
I'll stay on the short side.

Take me back to yesterday,  
If you can forgive me,  
I will, stay by you only,

Though if, you can forget,

We can get around this,  
Get around this, get around this,  
Get around, we can get around this,  
Get around this, mess.

So hold on, baby don't you leave me,  
Please just, hold on, to me.

Take me back to yesterday,  
I swear it on your life,  
I'll stay on the short side,  
I'll stay on the short side.

Take me back to yesterday,  
If you can forgive me,  
I will, stay by you only,  
Though if, you can forget,

We can get around this,  
Get around this, get around this,  
Get around, we can get around this,  
Get around this, mess.

We can get around this,  
Get around this, get around this,  
Get around, we can get around this,  
Get around this, mess.
