This one right here is for you Live at home [Let me hold you] Tight like the way I handle my mic Asheru got an appetite for the Rapper's Delight Other dudes might tell you that they grindin' I grind too but not only work, I need my stomach lined an' See, I'm always hungry Enough to snap out go hard and humphrey a whole other country Barely got love in my own land A damn shame, that's why do it yourself is my campaign I let my mind do the walkin', passport do the talkin' When I come out to see you in a foreign land And I know when we get together it's for better or worse Cause every verse be with the track like they holdin' hands Don't want to hold the crown, just want to hold it down That's my stee' lately as I get older and wiser But don't you take me for a joke, young man [This is insomniac] Cause I spit my gunsling with the best of 'em, shizer
