(Verse1)

How many times must we start again  
The creation of the world from beginning to end  
What will it take before we learn  
We gotta wake up now 'n' show some concern  
What will the future hold  
How many untold stories will be told  
Just what will the future bring  
How many species of birds will have a song to sing  
Man 'n' man can't even get on  
'N' man n' womans been at war for far too long  
Superior race all this black 'n' white vision  
Catholic - Muslim there's to many religions  
Too much hatred too much greed  
Ignorest people pollute the air that we breath  
We're gotta wake up now before it's much too late  
Hungry people need food on their plate  
People being killed for just a few pence  
Can you justify that 'cause it makes no sense to me  
You're growing up much to fast  
The distruction of mankind - how long will it last

(Verse2)

Perfect - that's what I'm striving to be  
The next best thing will do for me  
I do my best you disagree  
Holier - than - thou holier - than - me  
Committing crimes with no remorse  
As good as gold now an evil force  
One word discription is a dis  
You like a boy down for his bag of cheese 'n' onion  
crisp  
And you don't even stop to think  
Whatever happened to the dinosaurs could make us all  
extinct  
I'm being judged by the clothes that I wear  
We gotta educate those with a grudge to bare  
But I'm content to a certain extent  
You're condemned for life it's too late to repent  
Inna - most beauty such a terrible waste  
Caught between a rock 'n' a hard place.

(Verse3)

Be judged by according to what you've done

Live his life the next is a better one  
Eat the fruit from the tree of life  
'Cause if you live by the sword...you'll die by the knife  
How great and wonderful are your days  
How right and true are your ways  
No more death,grief,crying or pain  
'Cause only the good things will remain...  
Heed my words 'cause what I'm saying is true  
Treat them exactly as they treated you  
Wipe away the tears from your eyes  
Be proud,life your head up - reach for the skys.  
(Verse4)

Condemned for what you did to them  
Now see how quick they fall to worship him  
There's a place in my heart that makes me understand  
Prepared 'n' ready like a bride dressed to meet her  
husband  
Treat life as a learning process  
I said turn right so you took a sharp left  
Wake up and we'll all sleep peacefully  
The sun shines but it still seems bleak to me  
You tell a lie and convince me it's the truth  
I'll well mannered yet you still call me uncouth  
I believe that there's got to be much more  
I hope I'm ready when death comes knockin' on my  
door  
Maybe tonight maybe as I sleep  
It can drive you mad if you think too deep  
But don't have a breakdown 'cause I called you a down  
You threw a punch 'n' missed I killed you with a kiss  
What on earth will you do then  
The hour of your death amen  
'N' all the prejudice that I've sustained  
I know it sounds funny but I just can't stand the pain.  
Six foot below  
Reap what you sow  
Grim without grief  
Sad without sorrow
