There are a hundred pointers, we don't ever want to  
care about  
It's time for a policy, they don't want to know nothing  
about  
Common sense and reality, words we don't like, never  
did like  
I have a cloud beckons over me and the wrong and the  
right

Oh, so far away from home  
I know exactly what to do

Watch him go down and down  
And when we are first in line  
And when we are satisfied  
It's just a goodbye

And we are struggling to make sense  
Somehow we shocked the underworld  
Looking for a house, yeah  
Looking for a place where no one can hurt us  
Looking like strangers and we are making ourselves  
heard

Oh, so far away from home  
I know exactly what to do

Watch him go down and down  
And when we are first in line  
And when we are satisfied  
It's just a goodbye

Oh, so far away from home  
I know exactly what, I know exactly what to do

Watch him go down and down  
And when we are first in line  
And when we are satisfied  
It's just a goodbye
