

Sailor

"My girl"

Visit "[My girl](#)" on MotoLyrics.com

So long to the lonely road full of drifters from town to town
So long to the lonely world that held me right down For
things have changed, they've been rearranged
She knew how to pull me through
Let me tell you that my girl, she knows what to do
Well, I've had my share of dates like a boy should
From girl to girl
But this time what I've found is a beautiful world
She knows the way to those happy days
And just how to start anew
Let me tell you that my girl, she knows what to do

(Chorus):

My girl (she's a lady)
My girl (she's no baby)
My girl, she knows what to do to bring
Love sweet loving and good times back again
My girl, she knows what to do

Well I've had those well-off deals with the ladies
Well combed and curled
But this girl she's got love that's out of this world
She lets me feel that her love is real
And I know that it's true
Let me tell you that my girl, she knows what to do
(Repeat chorus three times)
Yeah, my girl, she knows what to do
