"People in love"

Visit "[People in love](#)" on MotoLyrics.com

People in love, they don't care about the late night
news

They don't ever get the midnight blues

Of lonely, sleepless nights

People in love, they don't need to go to fancy do's

Or spend their money on a package cruise

They'd rather stay at home, just to be alone

(Chorus):

For they've got that magic recipe

The kind that no one can buy

And only fools and well-trained scientists

Keep on wondering why (yi-yi-yi)

People, people in love

People, people in love

People in love (love), they don't care about the
neighbour's lawn

Being sprinkled every early dawn

Putting theirs to shame

People in love (love), they've got better things to do in
life

Than playing out the part of man and wife

And let the garden hide all that's wrong inside

(Repeat chorus)

They've got that magic recipe

And only fools and well-trained scientists

Keep on wondering why (yi-yi-yi)

People, people in love

People, people in love

People, people in love

People, people in love

(Repeat and fade)
