

Sailor

"Romance"

Visit "[Romance](#)" on MotoLyrics.com

Romance, romance, romance...
You keep me dancing all night long
You like to lead me on
The chimes of midnight will fade away
And I know that nobody else is going to matter until it's
day
So let the 'boys night out on the town'
Carry on without me
I know a place I'd rather be

(Chorus):

To look at you is just another way to look at romance
To be with you is to fill my world full of romance
Nobody else could be closer to me
But that's the way that lovers ought to be
Just you and I together making romance
Romance>

You keep me dreaming all day long
You've got me holding on
To every moment that came our way
For I know that I'm gonna need you by night and day
(Repeat chorus)
