### "Sailor's night on the town"

Visit "[Sailor's night on the town](#)" on MotoLyrics.com

Hey there! You better get up now, and clean up your place

Can't you see there are ships in the harbour?

Put on your best face, and turn on your lights

And spray some perfume in your parlour

But don't lose your head, just keep to your trade

Treat him with love, but only after he's paid

For living is dear, and so much shorter each year

So make the most of it while you're still young

(Chorus):

It's the sailors' night on the town, girl

By now you should know what to do

It's the sailors' night on the town, girl

Can't you hear them calling for you?

So, fill them with lust and sparkling champagne

Give them a good time so they will come back again

It's the sailors' night on the town, girl

So make the most of it while you're still young

Sailors and miners, or just men about town

They need you like whisky and brandy

And though they may be as proud as the rooster at dawn

In your bed, they're like children with candy

So, don't be afraid, just do what you can

And some day, who knows, you might even find your own man

So, don't let your dreams gather dust from today

Just make the most of it while you're still young

(Repeat chorus)
