burn the bed
consummated
rest the head
it just holds us back now
still she keeps on looking
of course [2x]
nows theres nothing I hate as much
wet the lips
shut your pretty mouth
use the kiss
tomorrow fails to exist
still she keeps on looking
of course [2x]
now theres nothing I
it all surfaces in this light
words under my breath
taking my time
breaking your smile

feed the wish
let it flourish
head for shore
let me haunt you
still she keeps on looking
now theres nothing I hate as much [2x]
I will sleep
(It all surfaces in this light)
throughout the infection
fast asleep
where nothing can find me
words under my breath
taking my time
breaking your smile
everyone goes away
I cant even try
I watched you slip away
