[these are the original lyrics - the et's cover of the song features some changes and a brand new chorus... I have all the info I need, will update this following the unmothballing of thr site..

R

So here am I quite by chance near the phone
I could call and make you crawl into bed
Questions always questions
I'll just speak in slow motion
About obsessions with boys on the floor

Take that smile off your face
Wipe that tear from your eye
Don't say you're sorry for me

Now look at me like a stormtrooper in drag
And I'll let you feel exactly like I do
It's so disgusting I'm so tired of rhythm
And needles in arms
I don't want your point of view

Nothing to do
Nothing to do steal
And there's nothing to say

Love it
Love it
I need to
